WWW.AKS-UNITED.COM

AKS United Co. is a highly specialized engineering and technical solutions provider, committed to serving the diverse needs of industries across Kuwait and the GCC region. We deliver project-based services across key sectors including construction, oil & gas, infrastructure, and IT & communication.

With proven expertise in managing projects from concept to completion, we offer end-to-end solutions—right from initial design and planning to execution and successful closure—ensuring cost efficiency and timely delivery.

Our strength lies in our team of qualified engineers, technical specialists, and industry consultants, who bring years of experience and deep domain knowledge to every project. Working in collaboration with our strategic partners, our dedicated Slot-V team ensures that every project is tailored to the client's specific needs, translating vision into tangible, high-quality outcomes.

Engineering Solutions. Delivered with Precision.

Value Proposition

We provide end-to-end engineering and technical solutions that combine expertise, innovation, and reliability—delivering measurable value through quality, efficiency, and timely project execution.

Our Vision

To be a regional leader in delivering innovative, reliable, and sustainable engineering solutions that drive progress and build a better future.

Our Mission

To deliver high-quality engineering and technical services with a focus on innovation, safety, and client satisfaction—ensuring successful, cost-effective project outcomes across diverse sectors.

Market Segments

The residential cities. Development & Infrastructure sector

At AKS United Co., in collaboration with our global principals play a vital role in the development of residential cities by delivering comprehensive infrastructure solutions that support modern, sustainable living environments. Our services encompass the full project lifecycle—from master planning and conceptual design to engineering, procurement, and construction (EPC) of essential infrastructure systems

Civil Construction Sector

AKS United Co. in collaboration with our global principals offers end-to-end solutions in the Civil Construction sector, delivering high-quality and sustainable infrastructure that meets the dynamic needs of clients across Kuwait and the GCC. Our capabilities span across industrial, commercial, and residential projects, with a strong focus on safety, engineering excellence, and timely delivery.

Oil & Gas & Refineries Sector

AKS United Co. in collaboration with our global principals is a trusted partner in the Oil & Gas and Refineries sector, delivering specialized engineering, procurement, and construction (EPC) services that meet the highest standards of safety, quality, and operational excellence. We support upstream, midstream, and downstream operations with tailored solutions that address the complex challenges of the energy industry.

Market Segments

Communication & IT

AKS United Co. in collaboration with our global principals delivers cutting-edge solutions in the Communication & Information Technology (IT) sector, enabling digital transformation and robust connectivity for organizations across various industries. We provide customized, scalable, and secure IT and communication infrastructure designed to support the evolving needs of modern enterprises and smart cities.

Equipments & Machinery

At AKS United Co., we understand that the success of any engineering or construction project heavily depends on access to the right equipment and machinery. We offer through our market connection a comprehensive range of heavy equipment, construction machinery, and technical tools to support diverse industrial, civil, and infrastructure projects across Kuwait and the GCC.

Power & Water Treatment

AKS United Co. in collaboration with our global principals delivers specialized solutions in the Power and Water Treatment sector, addressing the region's growing demand for reliable utility infrastructure. We provide engineering, procurement, and construction (EPC) services for power generation, electrical distribution, and water treatment systems, enabling sustainable and efficient resource management across industrial, commercial, and municipal projects.

Market Segments

Defense Sector

AKS United Co. in collaboration with our global principals provides tailored engineering and technical support solutions for the Defense sector, serving military, security, and government agencies with a focus on reliability, confidentiality, and mission-critical performance. Our capabilities are aligned with national defense priorities, offering comprehensive services that enhance operational readiness, infrastructure resilience, and technological advancement.

Marine Sector

AKS United Co. in collaboration with our global principals offers specialized solutions in the Marine Sector, supporting maritime infrastructure development, port operations, and offshore/onshore marine projects across Kuwait and the GCC. With a focus on engineering excellence, operational safety, and environmental compliance, we deliver high-performance marine services tailored to the demands of both public and private sector clients.

Services

Project Management

AKS United Co. in collaboration with our global principals facilitates world-class project management services across various sectors. Acting as a strategic agent for leading EPC firms, we ensure the seamless coordination of all project phases—from initiation and planning to execution and delivery.

Our role includes aligning international expertise with local requirements, maintaining high standards of quality, compliance, budget control, and timely delivery. We serve as a reliable partner, bridging global capabilities with regional project demands.

Mechanical Engineering

AKS United Co. in collaboration with our global principals supports the delivery of advanced mechanical engineering solutions across diverse sectors. As a trusted agent for international EPC leaders, we help bring world-class expertise to projects in HVAC systems, piping, plumbing, fire protection, and other critical mechanical systems.

By aligning global capabilities with local project needs, we ensure efficient, sustainable, and code-compliant mechanical infrastructure that meets the highest industry standards. Our involvement ensures streamlined coordination, technical precision, and successful project execution across industrial, commercial, and residential developments.

● Electrical Engineering

AKS United Co. in collaboration with our global principals facilitates the integration of cutting-edge electrical engineering solutions across all project types. As a regional agent for renowned EPC contractors, we help deliver high-performance systems including power distribution, lighting, low-current systems, and energy management solutions.

Our approach ensures that each project benefits from international expertise, strict adherence to safety standards, and optimized energy efficiency. We serve as the critical link between global engineering capabilities and local project demands across industrial, commercial, and residential developments.

Design / Build

AKS United Co. in collaboration with our global principals offers comprehensive Design / Build solutions, acting as a regional agent for leading international EPC firms. This integrated approach streamlines project delivery by combining conceptual design, detailed engineering, procurement, and construction under a single coordinated effort.

We facilitate the delivery of innovative, cost-effective, and sustainable infrastructure tailored to client needs—ensuring seamless communication between stakeholders, faster timelines, and optimized resource utilization across industrial, commercial, and residential projects.
